

Richard Moorhead

Overland Park, KS • (785) 331-6291 • richard.moorhead@gmail.com

Staff Data Engineer • Distributed Systems • Real-Time Analytics

Staff-level engineer with 10+ years building high-throughput platforms spanning streaming data, APIs, lakehouse analytics, and cloud infrastructure.

Core strengths

- **Streaming & event-driven systems:** Kafka, Kafka Streams, Flink, Beam
- **Lakehouse & query engines:** Spark, Delta, Trino
- **Search & indexing:** OpenSearch, Kafka Connect
- **Backend services:** Java, Go, Python; REST/WebSocket; gRPC; OpenAPI
- **Cloud & platform:** AWS, GCP, Kubernetes, Helm, GitLab CI, Terraform
- **Leadership:** technical lead, platform design, cross-team delivery

Experience

Raft — ABMS CBC2

Staff Data Engineer | Aug 2023 – Present

Cloud-based command & control platform for real-time aircraft telemetry.

- Built high-throughput **WebSocket and REST APIs** using Quarkus
- Designed and implemented **real-time full-text search** using OpenSearch and Kafka Connect
- Architected **data lake ingestion and query services** using Spark, Delta, and Trino
- Designed platform services with **Flink SQL** and **Kafka REST Proxy** for query processing and topic provisioning.

Oracle Cerner — HealthIntent (Master Person Management)

Lead Software Engineer (Technical Lead) | Feb 2023 – Aug 2023 (Cerner acquired by Oracle)

Master Person Management applies deduplication logic to patient data at scale.

- Modernized probabilistic matching into **stream processing** with Beam, Flink, Kafka, and HBase.

GameStop — Blockchain

Senior Software Engineer | Oct 2021 – Dec 2022

Lead backend developer for blockchain wallet services supporting iOS and browser clients.

- Designed and implemented wallet backend services (Go API gateway, Scala gRPC services) backed by DynamoDB.
- Generated and integrated **OpenAPI clients** for Swift and Node.js into both iOS and browser extension applications.
- Deployed services with GitLab CI and Helm on Kubernetes.
- Provisioned production infrastructure with Terraform

Cerner Corporation — HealthIntent (Master Person Management)

Lead Software Engineer | Feb 2019 – Oct 2021

C2FO

Data Engineering Team Lead | Jun 2015 – Nov 2018

Data platform supporting invoice funding marketplace analytics and operations.

- Built ingestion pipelines on **AWS** and **GCP**
- Delivered ETL to smooth aperiodic invoice data into weekly time series for credit modeling.

Cerner Corporation

Software Engineer | Jun 2011 – Jun 2015

- Built hospital/physician analytics dashboards

Education

University of Kansas — B.S. Computer Science | May 2011
